Profile Summary

Aspiring AI & Machine Learning Engineer with hands-on experience in Explainable AI (XAI), uncertainty quantification, and hybrid deep learning architectures. Skilled in Python, PyTorch, and interpretable AI systems, with a strong interest in real-world AI research.

Education

Bachelor of Technology in Artificial Intelligence and Machine Learning

2022 – Present

APJ Abdul Kalam Technological University (KTU)

Technical Skills

Languages: Python, Dart, TypeScript

Frameworks: Flutter, Flask

AI/ML: PyTorch, TensorFlow, Scikit-learn, Explainable AI (XAI)

Tools: Git, GitHub, VS Code, Google Colab, Figma, Canva, Vercel

Projects

Ada-XAI — Adaptive Explainable AI for Brain Tumor Diagnosis *Python, PyTorch, XAI, Vision Transformers*

Developed a hybrid MRI brain tumor classification framework combining EVA-02 Vision Transformers and Deformable CNNs with Cross-Attention Fusion. Proposed an adaptive explainability mechanism that dynamically selects between Grad-CAM and CAD-GMAR based on model dominance, achieving 99% classification accuracy on benchmark MRI datasets.

DOI: ICITIIT68860.2026.11499683

CRDA-XAI — Cross-Reasoning Disagreement Analysis for Voice Pathology Detection *Python, Deep Learning, XAI*

Developed a hybrid deep learning framework integrating SE-ResNet, CoAtNet, and CaiT for pathological voice classification from mel-spectrograms. Proposed CRDA, a novel uncertainty quantification and explainability framework for identifying unreliable predictions in hybrid AI systems, achieving 93.81% accuracy on voice pathology datasets.

Experience

Webmaster, IEEE SB SBCE

2026 – Present

Contributed to technical projects, web management, and collaborative development initiatives.

Developer Team, TinkerHub SBCE

2025 – 2026

Contributed to technical projects, web management, and collaborative development initiatives.

Achievements & Hackathons

- Runner-Up at the **Genesis 2.0 National Level Hackathon** at Providence College of Engineering.
- Winner of **Best Paper Award** at **ICITIIT 2026, IIT Kottayam** in the *Explainable and Intelligent Systems* category.

Research Interests

Explainable AI (XAI), Vision Transformers, Medical Imaging, Hybrid Deep Learning Architectures, Uncertainty Quantification
